

Unit Plan: Arduino Motors

Marieke Thomas

Basic Info

- Course: Electrical Engineering
- Previous unit: LCD, Next unit: Final Projects
- Motivation: motors are a component that I've been wanting to use with my classes but haven't
- Lost of practical applications + room for creativity
- Language: C++

Standards

- 9-12.IC.7 Career Paths: Investigate the use of computer science in multiple fields.
- 9-12.CT.4 Abstraction and Decomposition: Implement a program using a combination of student-defined and third-party functions to organize the computation.
- 9-12.CT.8 Abstraction and Decomposition: Develop a program that effectively uses control structures in order to create a computer program for practical intent, personal expression, or to address a societal issue.
- 9-12.DL.2 Digital Use: Communicate and work collaboratively with others using digital tools to support individual learning and contribute to the learning of others.

Lesson Sequence

- Lesson 1-2: Analog Motors
- Lesson 3: Intro to Digital Motors
- Lesson 4-5: Hobby Motors
- Lesson 6-7: Servo Motors
- Lesson 8-9: Servo Robot Project*
- Lesson 10-11: Stepper Motors
- Lesson 12-13: Windmill Project*

*Summative assessments

Lesson 1-2: Analog Motors

- Students construct basic motors and discuss what they are and how they work

Lesson 3: Intro to Digital Motors

- Introduce the 3 types of motors that we will be using

**Basic DC
Motors**

**Servo
Motors**

**Stepper
Motors**

Lesson 4-5: Hobby Motors

- Students learn how to use DC hobby motors with an Arduino

**Basic DC
Motors**

**Servo
Motors**

**Stepper
Motors**

Lesson 6-7: Servo Motors

- Students learn how to use Servo motors with an Arduino, including using the servo library

**Basic DC
Motors**

**Servo
Motors**

**Stepper
Motors**

Lesson 8-9: Servo Robot Project

Students design and create projects using servo motors to control their own hardware

Lesson 10-11: Stepper Motors

- Students learn how to use stepper motors with an arduino

**Basic DC
Motors**

**Servo
Motors**

**Stepper
Motors**

Lesson 12-13: Windmill Project

Students use
stepper motors to
control model
windmills built by
freshman
engineering
students

Tools

- Arduino Web Editor IDE
- TinkerCad
- Elegoo Uno Super Starter Kit and 9V batteries
- Google classroom
- Smartphones to film projects
- Laser cutter and 3D printer
